

Professional Summary

Technical Virtual Assistant focused on web support, troubleshooting, QA, business systems, and practical automation. Hands-on experience maintaining and improving live websites, resolving user-flow and database-backed issues, supporting admin tools, testing responsive interfaces, assisting with deployment, and working with REST API integrations. A web development background allows me to handle technical support tasks that sometimes require code while keeping the priority on dependable day-to-day remote support.

Core Capabilities

Technical VA Support Ongoing website, system, documentation, and remote task support	QA & Troubleshooting Issue tracing, workflow testing, mobile checks, verification	Systems & Data Support Admin tools, records, database-backed workflows
Website Support Maintenance, forms, deployment help, production fixes	API & Automation REST APIs, Loyverse, email and workflow flows	Code-Based Fixes PHP, JavaScript, Next.js when support tasks need code

Technical Support Experience

- Diagnose and resolve website, form, database, admin-dashboard, and user-flow issues.
- Maintain and update live web applications, customer-facing pages, and internal business systems.
- Test customer and administrator workflows across desktop and mobile before deployment.
- Support hosting, deployment, configuration, browser troubleshooting, and production fixes.
- Work with REST APIs, third-party integrations, email flows, and practical workflow automation.

Selected Project Experience

Triple Vision Realty Platform

Real Estate / Lead & Sales Attribution

- Supported property listings, admin workflows, buyer leads, mobile lead presentation, and agent referral attribution.

DOUS E-Borrower's Card System

Academic Library / OJT Project

- Built and deployed a student/admin portal with borrower access, registration, database-driven workflows, and testing.

Soy Yummy E-commerce Platform

E-commerce / Retail Operations

- Supported customer ordering, products, branch workflows, inventory-related records, POS/admin tools, UI fixes, and testing.

Chuchu Milktea Loyalty Kiosk

Loyalty / Loyverse API Integration

- Built and refined a tablet loyalty flow with Loyverse receipt data, browser polling, receipt sync, claim windows, and kiosk UX.
